

KEVIN GONTIJO ALVES

AI Automation Engineer | Python, FastAPI, LangGraph, n8n and Reliable Agent Workflows

Brasilia, Brazil | kevingontijoalves@gmail.com | linkedin.com/in/kevin-gontijo

AI automation engineer with one year of focused independent product development. Builds stateful agent workflows, API integrations and operational tools with explicit validation, retries, logging, automated tests and human review. Best suited to scoped implementation, workflow reliability and backend integration work.

VERIFIED ENGINEERING EVIDENCE

- **Verified automated testing.** 127 existing tests, 11 MCP reliability tests and a Playwright suite passing three consecutive Chrome runs.
- **End-to-end ownership.** Designed backend services, state models, databases, lightweight interfaces, authentication and deployment workflows.
- **Operational safeguards.** Implemented structured outputs, deterministic rules, audit-friendly decisions and approval gates before consequential actions.

EXPERIENCE

- Independent AI Agent and Automation Developer
- Self-employed | Sep 2025 - Present | Remote, Brazil
- Build AI and automation products with Python, FastAPI, LangGraph/LangChain, n8n, PostgreSQL, REST APIs, webhooks and RAG.
 - Translate ambiguous processes into stateful workflows with explicit inputs, outputs, failure paths, acceptance rules and documentation.
 - Debug integrations and evaluate regressions through deterministic tests, observable execution and edge-case validation.

SELECTED SYSTEMS

- **Reliability portfolio.** MCP server with prompt evaluation and fallback, plus a Python Playwright page-object harness with HTML/JUnit reports.
- **Kevin OS.** Private operations platform combining project tracking, CRM, controlled memory, agent routing, approval queues and WhatsApp webhook handling.
- **Capsula.** Deterministic B2B authorization engine for agent-initiated payments, with multi-tenant API authentication, auditable decisions and offline tests.
- **WhatsApp Business Doctor and SuperAgente Jade.** Conversational systems with intent classification, contextual memory, API integrations, execution guardrails and mandatory human approval.

TECHNICAL SKILLS

Core	Python, FastAPI, MCP, LangGraph, LangChain, n8n, PostgreSQL, REST APIs, RAG
Reliability	Pytest, LLM evaluation, prompt versioning, provider fallback, cost/latency metrics
Delivery	Git, CI, Playwright, JUnit/XML, deployment, authentication, technical documentation

EDUCATION

- Bachelor's Degree in Architecture and Urbanism
- IESB | 2018 - 2022 | Brasilia, Brazil
- Systems thinking, requirements structuring, documentation and design under constraints.
